

Type FBT-SH Forward Bin Tipper

The type FBT-SH Forward Bin Tipper is ideal for handling and emptying bins in agricultural and manufacturing industries. This Forklift slip-on attachment requires only a single hydraulic function. A purpose built hydraulic sequencing valve eliminates the potential to drop the bin (rotation will not commence until the bin is correctly restrained), while the gentle action of the clamp arms prevents damage to the bins. The standard unit will suit bins up to 1200mm square, with a height range of 675 to 925mm.

Non standard size and capacity attachments can be manufactured.

SPECIFICATIONS:

- Safe Working Load (SWL) 1000kg
- Unit Weight 290kg
- Load Centre 880mm
- Lost Load 300mm
- Pocket Size 155 x 55
- Pocket Centres 540mm
- Horizontal C of G 600mm
- Vertical C of G 75mm
