

## Type WP-UG Quick Hitch Work Platform

(Quick Hitch plates not shown)

The type WP-UG Work Platform has been designed for Quick Hitch mountings of various designs to suit specific Telehandler types. Manufactured strictly in accordance with Australian Standards, the type WP-UG Work Platform is mostly used for underground operations such as mining etc. to safely perform “Special Tasks” and is suitable for a maximum of two people.

The actual load capacity of the Work Platform may be restricted by the load capacity of the Telehandler – DO NOT exceed the rated capacity of the Telehandler to handle the load.

\*\*\* We recommend you check with your local Regulatory Authority (e.g. WorkCover), for special laws covering the use of personnel cages when fitted to Telehandlers.
